MOVEMENT INTEGRATED PEDAL**

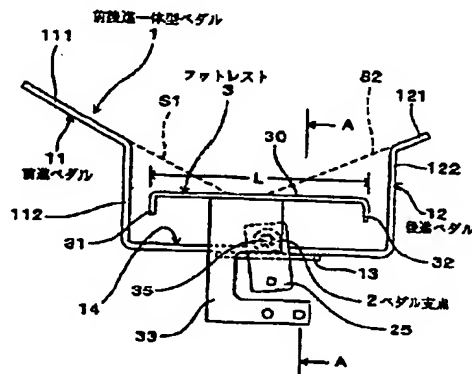

COPYRIGHT: (C)2001,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a vehicle having a forward and backward movement integrated pedal which reduces the fatigue of a driver and improves the travel stability of the vehicle.

SOLUTION: The vehicle has the forward and backward movement integrated pedal 1 which has a forward movement pedal 11 for operating a forward travel of the vehicle and a backward movement pedal 12 for operating a backward travel and is so provided that the pedals can rotate like a seesaw around a pedal fulcrum 2. A footrest 3 for supporting a leg of a driver is disposed above the pedal fulcrum 2; and the forward movement pedal 11 is operated by mounting the toe of the foot on the forward movement pedal while the heel is placed on the foot rest 3 and the backward movement pedal is operated by mounting the heel part of the foot on the backward movement pedal while the toe is placed on the footrest.
